FM 100-17-5: *Redeployment*

Redeployment Defined

- The transfer of a unit deployed in one location:

  - to another area for employment

    - to home station

Redeployment Phases

- **<u>Ph I.</u>** Recovery and Reconstitution, and Predeployment Activities

- **<u>Ph II.</u>** Movement to and Activities at POE

- **<u>Ph III.</u>** Movement to PODs

- **<u>Ph IV.</u>** Reception, Staging, Onward Movement & Integration

Ph I. Recovery,Reconstitution and Predeployment Activities

- After completing military operations, units move to assembly areas to prepare for redeployment

- Redeployment reconstitution focuses on:

  - Attaining required unit readiness levels

    - Equipment accountability and cross leveling of equipment and personnel

Redeployment Planning

- Redeployment OPLAN is key document. Normally contains guidance on:

  - Recovery and reconstitution activities

  - Movement of units, individuals and materiel

    - Re-establishment of APS stocks that were drawn during deployment

- Units develop their redeployment movement plans based on higher hqs plans

Key Redeployment Organizations

- Army Service Component Command (ASCC) or Army Forces (ARFOR) commander:
- Plan reconstitution and redeployment of Army forces based on Joint Force Commander (JFC) guidance

  Identifies organizations responsible for supporting redeployment

Key Redeployment Organizations (Cont)

- Theater Support Command:
    - Coordinates logistics support for redeploying units including:

    + Field services (laundry bath)
    + Maintenance and customs requirements
        + BBPCT needs

Key Redeployment Organizations (Cont)

- Installations

  - Receive redeploying units at POD

- Coordinate and support unit movements from POD to home station or demobilization station

Redeployment Transit Areas

- Areas designated to support redeployment movement from AO to final destination Includes:

  - Assembly Area (AA)
- Redeployment Assembly Area (RAA)
- Marshaling Areas & Staging Areas
- ASCC/ARFOR will designate transit areas

Assembly Area

- Assembly Area (AA):
  - Designated for units to assemble in after completion of operational mission
  - Unit moves to AA for initial redeployment   preparation
  - AA activities include reorganization, cross leveling of supplies, and preparation for movement to RAA or port area.
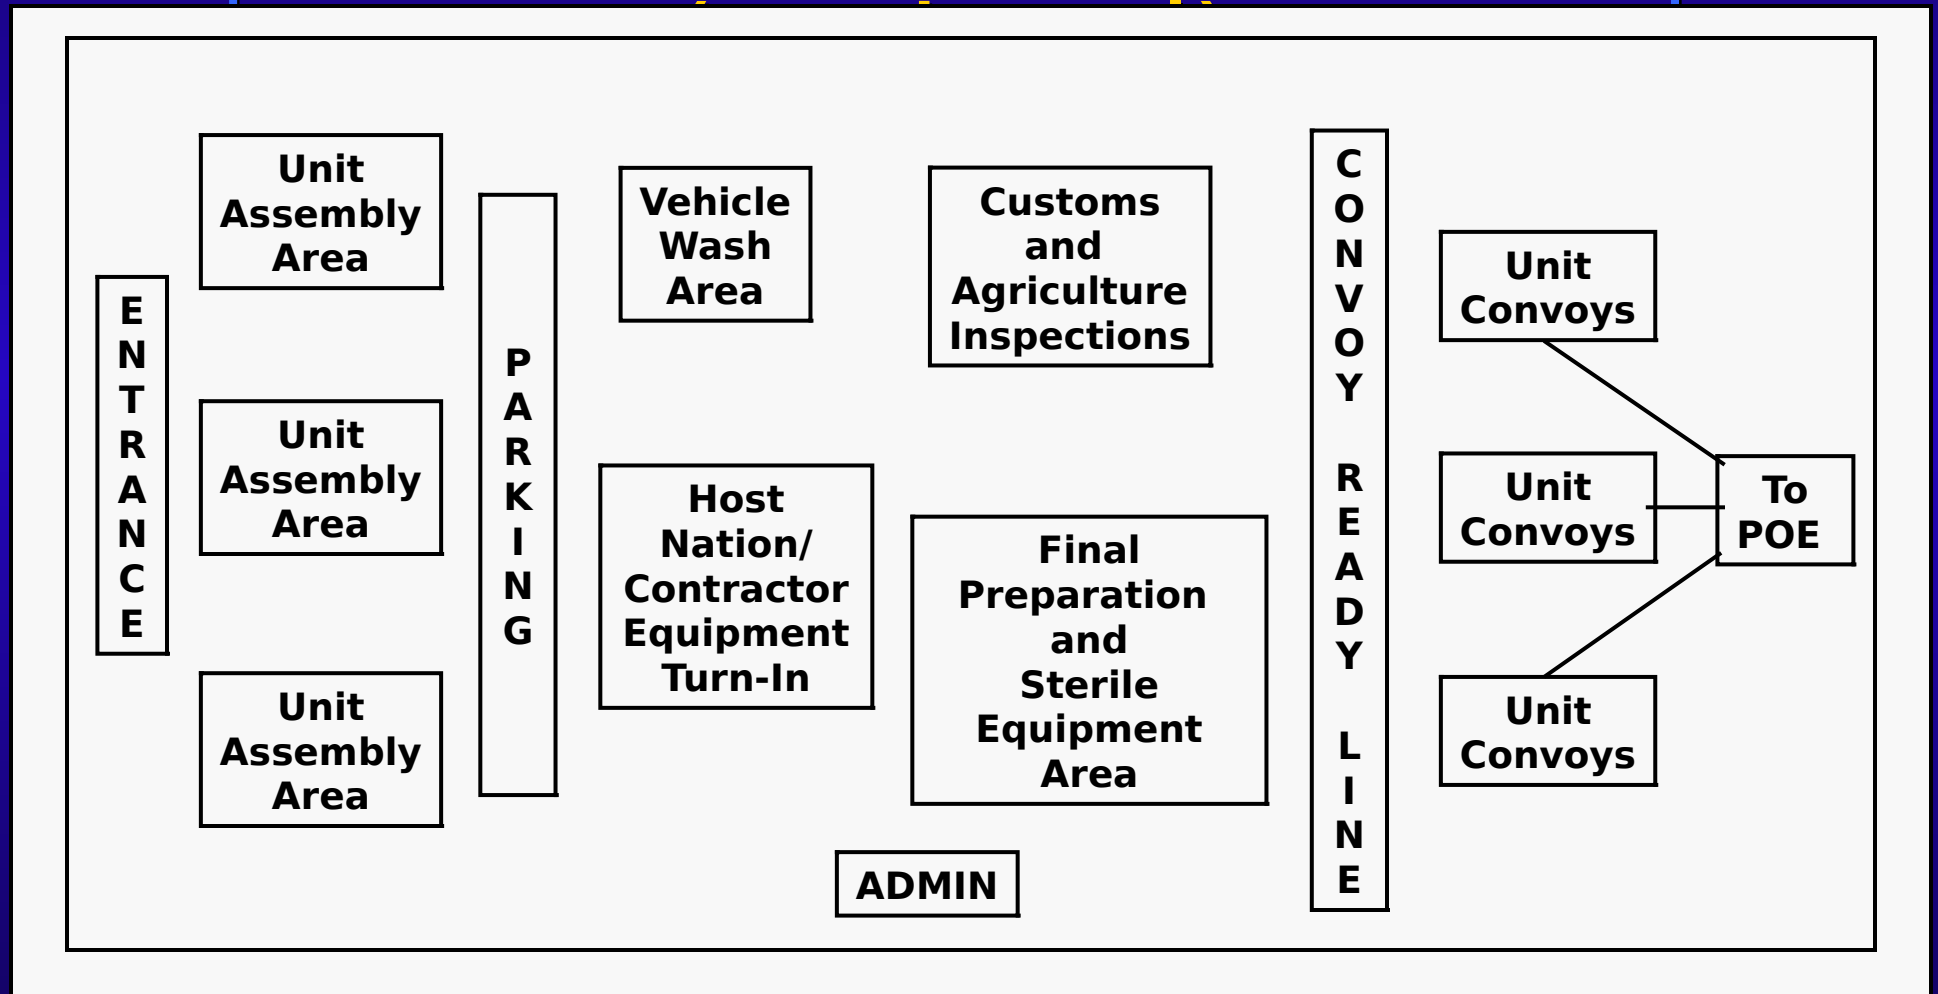

Assembly Area (notional)

ENTRANCE

Unit Assembly Area

Equipment Reconstitution and Cross leveling

Unit Convoys

Unit Convoys

Unit Convoys

Admin
- Update AUEL
- Coordinate Customs and Agriculture Inspections
- Identify 463L Pallet Requirements
- Request Theater Movement

Equipment Preparation
- Repairing
- Cleaning
- Marking
- Securing Internal Loads

To POE or RAA

Redeployment Assembly Area

- Redeployment Assembly Area (RAA):
  - RAA focus is preparation for move to POE
    - Normally located in COMMZ
      - RAA may be established due to security concerns, or when AA support is not adequa for redeployment preparation

Redeployment Assembly Area

Theater Staging Base (TSB)

- Theater Staging Base:

  - Established to support movements over long lines of communication (LOC)

  - May be required for redeployment of large forces
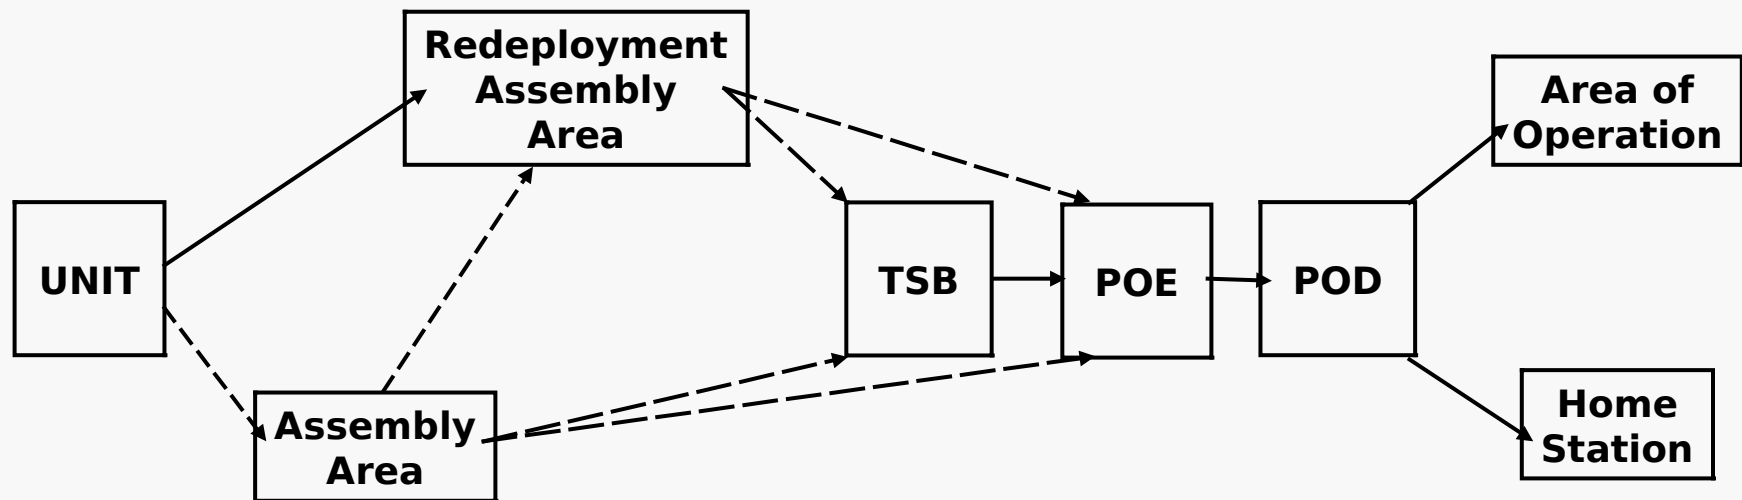

Marshalling Areas

- Marshaling Areas at POEs:
  - Final unit preparation area prior to moving to

    POE operations area
  - Personnel and equipment separated
  - Equipment configured for shipment
    - Generally includes call forward areas (CFA) and sterile areas.

Redeployment Routing

- Redeployment plan identifies redeploying unit routing
- Routing considerations include:

  - Size of redeploying force
    - Distance to POE
    - Time available
    - Enemy activity

Redeployment Routing Scenarios

SUMMARY

On Learning

On Learning

✔

QUESTION 1: What theater level command is responsible for coordinating & monitoring the logistics support for redeploying units during movement from assembly areas to POEs?

Answer 1: The Theater Support Command (TSC) coordinates theater logistics activities to support redeploying unit movement from AAs to POEs.

On Learning

QUESTION 2: What transit area is normally established to prepare a unit for redeployment when threat of attack or insufficient support structure prevents the unit from completing redeployment preparation in the Assembly Area?

Answer 2: Redeployment Assembly Areas (RAA) .

Supporting Commands,Unit & UMO Redeployment Activities -- Phases II through IV

Phase II. Movement to & Activities at POE

Phase III. Movement to POD

Phase IV. RSO&I

Ph II. Movement to POE Activities -- ASCC/ARFOR

- **ASCC/ARFOR** Actions:

    Develop OPORD for redeployment -- Provide info for redeployment requirements and procedures

  - Develop redeployment timelines

  - Verify unit movement and readiness data

Ph II. Movement to POE Activities -- TSC

- **Theater Support Command** (TSC) Actions:
  - Establish procedures to process APS & excess material
  - Establish & operate convoy support centers and POE marshaling areas
  - Control unit movements to POE

Phase II. Movement to POE Activities -- Redeploying Unit

- **Unit & UMO** Movement Activities in AA or RAA:

- Develop and refine the DEL / UDL

   - Pack and load containers -- must comply with agriculture and customs requirements

   - Identify BBPCT, container, flatrack and 463L pallet requirements

Phase II. Movement to POE Activities -- Unit (Cont)

- **UMO & Unit** Movement Activities in AA or RA (Cont')

- Conduct wash-down and customs inspection

- Prepare to provide load teams & drivers to POE

 - Process excess equipment for turn-in

  - If deploying to new theater for operations, d and receive required equipment

Phase II. Movement to POE Activities -- Unit (Cont.)

- **UMO & Unit** Movement Activities in AA or RAA: (Cont')
  - Load equipment, containers, flatracks and 463L pallets -- Coordinate with custom prior to loading containers & military vans (MILVANS)

    Configure equipment for transport (e.g., convoy, rail)

Phase II. Activities at the POE

- Units redeploy through APOEs and SPOEs

Could also redeploy via rail and road

- POE procedures are same for redeployment to home station & redeployment to second thea of operations

Phase II. Activities at the POE -- TSC

- **TSC** Activities:

- Control unit moves from combat zone to POE

    - Operate marshaling area/equipment turn-in sites

    Provide or coordinate DACG & PSA support, as required

Phase II. Activities at the POE-- Redeploying Unit

- **UMO & Unit** Movement Activities upon arrival at POE

- Unit normally moves to POE marshaling area
  - Unit prepares unit equipment & personnel for
    processing through POE operations areas
  - Send liaison officer to POE operations
    area and equipment turn-in/issue sites

Phase II. Activities at the POE -- Redeploying Unit (Cont)

- **UMO & Unit** Movement Activities upon arrival at
  POE (Cont')
  - Move equipment to turn-in sites, as required

    - Move load teams to APOE/SPOE operating areas, as required

    - Load containers that were not stuffed in assembly areas

Phase II. Activities at the POE -- Redeploying Unit (Cont)

- **UMO & Unit** Movement Activities upon arriva at POE (Cont')

  - Finalize movement documentation (DELs, HAZMAT, cargo load plans, MSLs, AIT storage devices)
  - Conduct customs (if not previously completed in AA or RAA)
  - Conduct final wash-down

Phase II. Activities at the POE Redeploying Unit (Cont)

- **UMO & Unit** Movement Activities in POE staging/operating areas:

  - Unit responsibilities & procedures for POE processing essentially same as deploym

  - APOE (marshaling area, alert holding area, ca forward area, ready line)
  - SPOE (marshaling area, staging area, vessel loading area)

Customs and Agricultural Clearance Procedures

- Inspections can occur at any redeployment node (AA, RAA, POE, POD)

- Redeploying units coordinate inspection times with US Customs officials.

- Equipment inspection must be completed NLT 24 hours prior to departing POE

Customs and Agricultural Clearance Procedures (Cont)

- Unit equipment cleaned and laid out prior to inspection
    - Must meet USDA standards - 100% free of s vegetation, pests
- Requires wash racks and steam cleaners
    - Customs normally checks equipment at wash rack area

    After passing inspection, equipment moves to sterile area

Customs and Agricultural Clearance Procedures (Cont)

- Containers, pallets, crates inspected by custo as they are loaded / built

- Unit baggage:
  - Units inspect all baggage for cleanliness & prohibited items before moving to custom inspection point.

- Customs inspects 24 hrs before departure

- After inspection, baggage placed in sterile area

Customs and Agricultural Clearance Procedures (Cont)

- Redeploying Soldiers:

  - Soldiers and carry-on baggage process throu[gh] customs 4-6 hrs prior to departure

  - When cleared by customs, soldiers remain in sterile area until departure.

Ph III. Movement to POD

- From boarding at POE to offload at POD, passengers & cargo under USTRANSCOM authority

- Redeploying unit may provide supercargoes aboard ships
  - Supercargoes secure and maintain unit cargo during transit
  - Perform as unit liaison during discharge operations at SPOD

Ph IV. RSO&I

- Units redeploying to another overseas location for operations --
  - Begin RSO&I processes at POD
- Units redeploying to home/demobilization stations --

  - Undergo reception and onward movement activities

- As RSO&I covered in previous lesson, focus is on redeployment to home/demobilization station

Reception

- Reception process consists of:

    - Offloading personnel and equipment from strategic or operational transport

  - Marshaling local transportation
  - Reception and onward movement plan developed by Supporting Installation (SI)
    and Commander receiving the forces

Reception (Cont)

- Supporting Installation functions

    - Plans / executes return of units from POD -- processes convoy requests & obtains commercial transportation

    - Establishes enroute support sites required b redeployment plan

Reception (Cont)

- Redeploying Unit & UMO Functions at POD
    - Provide download teams and drivers to mov[e] equipment to marshaling area
    - Coordinate required customs and USDA clearance inspection with port operator
    - Perform equipment inspections & process movement documentation
    - UMO coordinates return of all equipment an[d] soldiers with SI reps or ITO

Onward Movement

- Defined as process of moving personnel and accompanying materiel from reception marshaling / staging areas to their destinations

- Onward movement mode is typically the sam deployment fort to POE move (e.g., convoy, rail, bus)

- UMO coordinates with SI and ITO for appropriate convoy clearances, railhead support, and enroute movement support

Activities at Destination Installations

- Supporting Installation:
  - Provides transportation & MHE/CHE as required
    to assist unit unloading
- Redeploying Unit Functions:

- Unload and turn-in equipment, as required
  - UMO updates AUEL and processes through UMC, and prepares for next possible deployment

SUMMARY

On Learning

On Learning

QUESTION 1: What redeployment specific US Government clearance processes must the unit plan for and undergo in theater prior departing the POE for CONUS locations?

Answer 1: Prior to departing POD:
   All DoD equipment/cargo is inspected by Customs & USDA
   Soldiers and their baggage clear customs

On Learning

QUESTION 2: For units redeploying to home station in CONUS, who does the UMO coordinate with at the POD for onward movement of personnel and equipment

Answer 2: UMOs coordinate with supporting installation ITO reps to arrange/finalize onward movement to home station

On Review

On Review

Question 1: How does the UMO determine the various transit areas in theater that the unit will use during redeployment?

Answer 1: The JFC or ASCC/ARFOR redeployment operations plan or order identifies transit areas. Specific redeploying unit areas are normally identified in the unit's higher hqs movement plans and orders

On Review

Question 2: When arriving at the redeployment POE marshaling area, the redeploying unit should provide liaison officers to what organizations?

Answer 2: The unit sends liaison personnel to POE operations area for coordination with port operations staff, DACG, and the PSA, and to equipment turn-in sites (as required).

On Review

Question 3: In what redeployment phase does the installation have primary responsibil for providing support to units that are redeplo to home station?

Answer 3: During Ph IV, (RSO&I), supporting installations normally have responsibility for supporting unit arrival at POD, and onward movement to destination.
On Review

QUESTION 4: After the redeploying unit arrives at home station, what are UMO responsibilities for unit movement data?

Answer 4: The UMO updates the AUEL and processes changes with the installation UMC.
